# Investment Thesis & Market

## 3. Thesis

- Corniche waterfront supply is structurally constrained; Tower 3 is the last releasing tranche of Marina Tower with direct marina frontage.
- Bundling six units unlocks a 20% discount vs. the published list, ~7 points beyond the single-unit discount ceiling, improving entry basis to SAR 1,160/sq ft blended.
- Business plan is a light-refurbishment + branded-lease strategy; no structural works, keeping capex at 12% of purchase price.
- Exit is underwritten to a portfolio sale to a regional REIT at a 5.75% cap, in line with two 2025 Corniche comparables.

## 4. Market evidence (Paseetah connectors)

- Doha prime residential capital values +4.1% YoY; Corniche micro-market +6.3% on scarcity of waterfront stock.
- Prime residential vacancy 6.8% and falling; branded-residence rents at a 22% premium to standard stock.
- SAIBOR 3M at 5.9% - debt priced at SAIBOR+185bps; sensitivity in Section 6 covers a +100bps shock.
- Two 2025 Corniche block trades cleared at 5.5-5.9% cap, supporting the 5.75% exit assumption.

## 5. Sponsor & alignment

Bohio Capital Partners commits 5% of Fund II equity alongside LPs. The deal team has closed three prior Corniche transactions (Fund I) at a realised 17.4% net IRR. GP carry is subject to an 8% preferred return and full catch-up.
