Knight Frank Valuation & Advisory Doha VALUATION REPORT Marina Tower - Mixed-Use Waterfront Asset Corniche, Doha Prepared for Bohio RE Fund II Report ref. KF-DOH-2026-0912 38 pages

1 INSTRUCTION & BASIS OF VALUE

We are instructed by Bohio RE Fund II to report the Market Value of the freehold interest in Marina Tower for financial reporting and secured-lending purposes. The valuation is prepared on the basis of Market Value as defined in the RICS Valuation - Global Standards ("Red Book"), and we confirm our valuer is RICS-accredited, suitably experienced in this asset class and market, and acts as an External Valuer with no conflict of interest.

2 THE PROPERTY

A 28-storey mixed-use waterfront tower on the Doha Corniche, comprising 320 residential units over a retail podium with structured parking. The asset is presently in Phase 2 of 6 of its development programme, with the superstructure at Level 12 of 28 and practical completion targeted for Q1 2028. Our inspection was carried out from ground level and the accessible completed floors.

3 TENURE & TOWN PLANNING

Freehold, held clear of any registered mortgage other than the facility disclosed to us. The building permit was issued in August 2025; the MEP permit remains in review with the competent authority. We have assumed, without independent enquiry, that all consents necessary for the scheme as designed are in place or will be granted in the ordinary course.

4 MARKET COMMENTARY

Prime waterfront stock on the Corniche continues to attract institutional demand, with net initial yields for stabilised assets of comparable quality transacting in a 6.25% - 6.75% range over the last twelve months. Occupier demand is stable; the principal risk to values remains the delivery pipeline scheduled for 2027-28 rather than any deterioration in current rental tone.

5 VALUATION APPROACH

We have adopted the investment method as our primary approach, capitalising stabilised net operating income at a market-derived equivalent yield, cross-checked against a residual appraisal reflecting the cost to complete. The comparable evidence relied upon is set out below.

Corniche Plaza, Doha | Feb 2026 | 204.0 | 6.35%
West Bay Residences | Nov 2025 | 167.5 | 6.60%
Al Bidda Quarter (part) | Sep 2025 | 143.2 | 6.75%

6 VALUATION

Capitalising a stabilised net operating income of SAR 11.8M at an equivalent yield of 6.50%, and having regard to the comparable evidence above, we are of the opinion that the Market Value of the freehold interest, subject to the assumptions and conditions in this report, is:

Market Value SAR 182,000,000 One hundred and eighty-two million Saudi Riyals

7 CURRENT TRADING VS UNDERWRITING

We note that the asset is presently trading below the sponsor's underwriting: occupancy stands at 90% against 93% underwritten, and operating costs are running at 31% of EGI against 28% underwritten. On that basis current-year net operating income of SAR 7.6M reflects a part-let, pre-stabilisation position. Our valuation adopts the stabilised position, and the gap between the two is a matter for the sponsor's business plan rather than a defect in value.

8 SENSITIVITY

Value is most sensitive to the capitalisation rate adopted. A movement of +25 bps to 6.75% would reduce the Market Value to approximately SAR 175.0M; a movement of 25 bps to 6.25% would increase it to approximately SAR 189.0M.

9 ASSUMPTIONS & LIMITATIONS

We have not carried out a structural survey, tested services, or undertaken environmental investigation. We have assumed the property is free from contamination and from any defect not apparent on inspection, that the cost to complete is as certified by the project cost manager, and that vacant possession of the unlet parts can be given on completion. This report is provided for the stated purposes and addressee only.

IN WITNESS WHEREOF this document has been executed as an original.
